

5 INDUSTRIES THAT ARE USING AI

SOCIAL MEDIA

AI-powered social media platforms bring personalized content to your fingertips. It also has the ability to translate text, detect fraud, and remove harmful posts.

LAW AND LEGAL

"AI contract review software can help ordinary people by digging through legalese and summarizing what intricate terminology means in plain language." (Baguley, 2023)

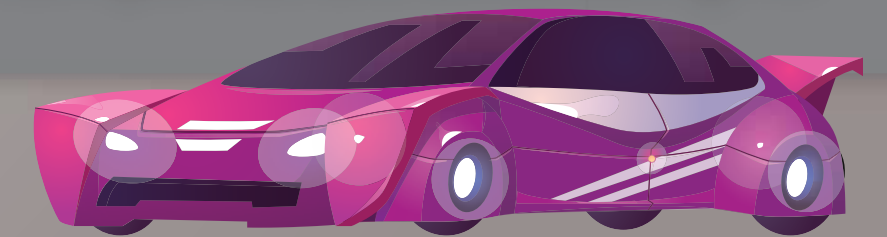

HEALTHCARE

AI can assist medical professionals with more accurate and timely diagnoses. For example, its potential to detect cancer cells at an early stage allows for quicker intervention strategies.

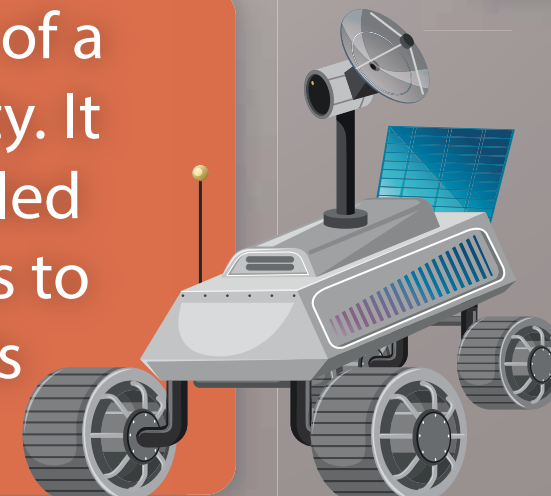

AUTOMOTIVE

With the creation of self-driving vehicles, automatic emergency braking, blind spot monitoring, and assistance in steering, more companies are embracing AI.

ASTRONOMY

AI sharpened the first image of a black hole, doubling its clarity. It also creates incredibly detailed images of simulated galaxies to help us understand worlds outside our own.
